

About Us

South Coast Mustangs is a specialist in all things classic Mustang, offering bespoke and customised restorations to the most iconic classic American muscle car. All of our work is undertaken with high attention to detail, creating one-of-a-kind classic Mustangs that exceed expectations.

The Bespoke Creation Process

If you choose to have a classic Mustang restored and styled to your specification, the following schedule is fairly typical of this type of project:

1. We source a solid shell (in North America), to use as the base for the project;
2. The vehicle is exported from the USA with the majority of restoration parts purchased, to expedite the process in the UK;
3. The vehicle is imported, customs cleared and delivered to our workshop facilities in the UK, where the restoration process begins;
4. Upon arrival, full inspection is carried out identifying the areas that require attention;
5. The shell is stripped to bare metal using media (recycled glass), and etch primed before repairs are carried out (where necessary);
6. The body is aligned, and sent away for paint – you choose the exterior colour (with our guidance if necessary);
7. It is then brought back to us, to be fully assembled as per the agreed specification.

Design & Specification

We will guide you in the specification decision (unless you know exactly what you want), as there are a variety of exciting and mouth-watering options to choose. Such items include:

- Shell Model / Year (Fastback, Coupe, Convertible)
- Engine – from a stock 4700cc V8 (280bhp), to a stroker 6700cc V8 (600bhp)
- Transmission (Automatic, Manual)
- Suspension, Steering & Brakes
- Exterior Colour & Style (Shelby, GT, Stock, Eleanor)
- Interior Colour & Style (Deluxe, Leather, Stock)
- Wheel Style (Stock, Chrome, Eleanor, Shelby)
- RHD Conversion (applies to 1967/1968 Model Years)
- Plus Many Other Upgrades Creating a One of a Kind Creation!
